Propspeed Commercial Kit

Peak Performance, Superior Protection & Cost Reduction

The PropSpeed Commercial Kit has been created specifically for the commercial marine trade professional. Corrosion and biofouling are a constant threat to the consistent performance of your fleet. Ensure your vessels operational readiness and sustained performance, while reducing maintenance and fuel cost with PropSpeed's original foul-release coating. PropSpeed has been protecting underwater assets for over 21 years, and has built a passionate team to offer superior in-field technical support.

The super slick coating system saves you time and money through increased efficiency and reduced maintenance costs.

EXCLUSIVE TO AUSTRALIA!*

UPDATED KITS

Propspeed Product Range

New Brand, Trusted Industry Leading Products

Fouling of running gear is a constant headache for boat owners, requiring expensive and time-consuming grinding and sanding to remove marine growth at every haul-out.

Take control with PropSpeed; the cost effective way to keep your marine vessel performing at its peak.

PropSpeed has been tried and tested around the world for over 21 years, consistently delivering customers the same result - improved boat performance, lower fuel and operational costs, sustained value of their investment, all while keeping the vessel's running gear operating and looking its best.

- For use on: Propellers, Rudders, Shafts, Bow Thrusters, Trim Tabs, Zeus Drives, Pod Drives and many more.
- Reduces drag.
- Reduces fuel consumption.
- Protects all underwater metals from marine growth and corrosion and stray currents.
- Long-lasting solution that, when applied and maintained correctly, protects underwater metal assets for 12-24 months.
- Foul-release, not antifoul. Foul-release coatings use physical means to reduce fouling, creating a surface that's tough for marine organisms to adhere to.

322050 Small Kit Includes:

- 1 x 96ml Etching Primer Base
- 1 x 24ml Etching Primer Hardener
- 1 x 80ml Clear Coat
- 1 x Propclean Wipes
